

# BRAINSTORMING

Make direct connections between students and university to avoid intermediaries

Prevent applicants from creating multiple user profiles to avoid data duplication

Government should provide a portal with all university eligibility requirements listed

Proper guidance should be provided to the students

Connecting with alumni or students who are currently enrolled in the college

Always look for university information

Colleges where we can explore our skills

Provide references from a trustworthy third-party website for a university

Verify the genuineness of the applicant to avoid any false applications

Students who applied to a university but were turned down should be informed

Reputation vs performance analysis in choosing a stream

Admission criteria for persons with disabilities (PWD)

Apart from eligibility criteria, make a comparison between multiple universities in the applicant

The top colleges determined by many factors other than just an institute rating

Consistent data collection
